with all their picturesqueness of big stitching. They are near relatives to revers, hip pocket laps, turn-over cuffs and lace trimmings are among the sea-

LOUIS XVI. COAT.

son's favored designs. This highly effective May Manton model is cut in the most fashionable lines and is adapted to velvet, velveteen, handsome cloth and silk, either with skirt to match or in contrast. The original makes part of a costume, the material for which is hunter's green velvet and is trimmed with bands of mink and large jeweled buttons, the rest being of brocade and the revers, collar and for evening wear and are both charmcuffs of Irish crochet over white ing and almost universally becoming. satin.

The waist portion fits snugly and includes single bust darts. The skirt is seamed on at front and sides, but | finished with a drapery of pink tulle cut in one with the back and the pocket laps are attached at the seams. The vest also is closely fitted and is joined to the fronts which are extended to turn back and form revers. The sleeves are in coat style with roll-over flaring cuffs and the neck is finished with a deep turn-over collar.

To cut this coat for a woman of medium size five and one-half yards of shown in the small drawings.

New York City.-Louis XVI. coats, | portion. Flare ruffles are finished with the rippling revers of fur seen on some "Louis" coats. The undulating ripples take away the severity of a cloth gar-

White Satin Linings. How many of these new jackets have white satin linings! Sometimes brocaded silk appears when a rich cape of sables is flung backward. The lining is pretty sure to be white. This daintiness is all very well for wearing over a light theatre waist, but it is anything but economic to wear a white satin lining over a dark cloth waist. The dark cloth is sure to come off a little on the white satin. The heat of the body will surely help to rub off a little of the crimson, brown, green or navy blue or black woolen upon the white lining. Gray does not seem to rub off, but other colored woolens are apt to do so.

Pretty Silk Sachets.

Little silk sachets are to be found in many designs. One of the prettiest varieties is of silk, a small bag, embroidered with forget-me-nots. While handwork is expensive as a whole, there are many small things done by hand which are in good taste.

Gilt Metal Buckles. There are buckles made of gilt metal over a background of black satin ribbon, the metal part being jureled.

Woman's Evening Waist. Full waists of light fabrics made in baby fashlon are in the height of style The very pretty model illustrated is of louisine silk, in a soft shade of pink, banded with black velvet ribbon and at the neck Over the shoulders are black velvet straps, covered with embroidery in pink and white and held by fancy ornaments. All soft, pliable materials are, however, appropriate, and the waist can be raised either by being made high, with yoke and long sleeves, or low with elbow sleeves, having the shoulders cut away or not, as

MISSES' LONG COAT.

material twenty inches wide, two and three-fourths yards forty-four inches closes at the centre front. The full wide or two and one-fourth yards fifty- soft back and fronts are simply gathfour inches wide will be required, with five-eighth of a yard twenty inches wide for the vest, one yard of all over lace for collar, revers and cuffs, and the waist and covered with any defour and seven-eighth yards of fur edging to trim as illustrated.

Misses' Long Coat.

Long coats, that completely cover the gown, make eminently stylish, comfortable out-door garments for young girls and are in the height of present styles. The excellent May Manton model, shown in the large drawing, is made from Oxford cloth, with simply stitched edges, and is serviceable at the same time that it is fashionable; but plain or covert cloth in black, grey. tan, brown and dark green and cheviot are all appropriate for fair weather coats, while waterproof finished cloths are admirable for rainy days.

The coat is loosely fitted without a seam at the centre back. It falls in unbroken lines and may be plain across the shoulders, or when desired, the applied yoke can be added as shown in the small sketch. The neck is finished with a regulation coat collar and lapels and convenient pockets are inserted in the fronts. The coat siceves are finished with becoming roll-over cuffs. The closing is effected invisibly by means of a fly.

To cut this coat for a miss of fourteen years of age three and one-half yards of material forty-four inches wide, or three yards fifty-four inches wide will be required.

Risen From the Ranks.

Promoted from the ranks of skirt flouncing, flare ruffles are rising in the scale. They are now an accepted mode of finishing the sleeve of a cloak or Newmarket. The sleeve is normal at the arm-size, and only increases slightly in its proportions at forty-four inches wide will be resecond and third are increased in pro- or tulle for bertha.

The lining is carefully fitted and ered at upper and lower edges and arranged over the foundation. The extension straps are cut in one with sired material. The tulle bertha is shirred on indicated lines and arranged over the neck edge. When yoke and sleeves are desired they can be made of the same or contrasting material, either as a separate guimpe with the lining for a foundation as part of the waist. The elbow sleeves are both fashionable and cut on exceptionally good lines, as the puffs fall exactly at the elbows, so allowing perfect freedom for the arms.

To cut this waist for a woman of medium size, two yards of material twenty-one or twenty-seven inches wide, or one and seven-eighth yards

the elbow. Nevertheless, just below quired, with two and one-eighth yards the elbow it is much extended in the of all-over lace for yoke and long graceful lines given by flare ruffles. sleeves, one and one-half yards for The upper one is moderately wide, the elbow sleeves and one yard of chiffon Burned Fortune For Religion.

The Rev. Charles Waggle, of Cincinnati, has just closed a revival in Pittsylvania County, in which he taught sanctification in extreme form. He tobacco was a vile sin. He told his converts to destroy their crops, and Matthew Serco, a young farmer, emptied his barns of \$8000 worth of tobacco, piled it in a heap, invited his neighbors and set fire to it .- Roanoke (Va.) Correspondence Philadelphia Record.

Most Costly of Silver Services. Few people, at least in this country. possess plate worth such a fabulous sum as that owned by London's Lord Mayor during his term of office. Its face value has been computed to be slightly over \$100,000, though three times that amount would not buy it. owing to the historical interest attached to many of the articles. The two solid silver soup tureens, which are employed at the banquets to distribute 100 gallons of clear turtle to the guests, are valued at \$2500 apiece, and are said to have been in possession of the corporation for over a century. Moreover, there is a gross of silver dinner plates worth \$7500, 200 ice pails valued at nearly \$5000, 200 entree dishes, the cost of which \$10,-000 would not cover; eighty solid silver meat dishes, worth another \$10,-000, and hundreds of other articles, such as grape scissors, saltcellars, waiters' trays, decanter labels, etc., all of solid gold or silver, and valued

Nothing is ever likely to shake the naval superstition that ships named after things that sting are doomed to loss. Besides the Viper and Cobra, the Serpent was lost with nearly all her crew, the Wasp was wrecked with heavy loss off Tory Island, and a second Wasp, a gunboat, disappeared in a typhoon, never to be heard of again. In consequence of this double disaster been struck out of the Admirality list of available names. In the past we lost Rattiesnake, Gadfly and Hornet. Probably a new Viper and a new Cobra will be built, but should anything happen to either of them the sentiment that prevails afloat concerning unlucky names. The only exception that obtains is the Resolution. The present ship is the tenth. No less than eight of them have had tragic fates, and the present one some years since very nearly met disaster at sea. Most of the old Resolutions, however, earned first glory in battle, hence the perpetuation of the name. -London Chronicle.

The Appalachian Park.

The proposed Appalachian national park purchase in West Virginia, Virginia, Tennessee and the Carolinas would cover a long, narrow slip of the Alleghany, Cumberland and Blue Ridge ranges. The area would be about 6300 square miles, or one-seventh the size of the State of Tennester larger than Connecticut, three about the same area as Connecticut and Rhode Island together. We hope the enterprise will be a success. It is high time that some authority intervened to save the remnant of the once magnificent Appalachian timber tion. The States apparently cannot. They will not even try.-Chattanooga Times.

Benefits in Smallpox.

A limited advent of smallpox such as we are now witnessing in London has, at any rate, this advantage, that it leads a large number of people to declared that the use and raising of get definite information on the subject of vaccination and enables medical men to read a lesson to which at other times the public may turn a deaf or indifferent ear. The laziest or least curious individual becomes interested to know the truth about preventive measures when smallpox is next door .- London Lancet.

> The Transit of Venus. In the "Life of Major-General Sir Robert Murdock Smith, K. C. M. G.,

"On their way between Telriz and Teheran the members of the expedition sent to Persia by the German Government to observe the transit of

we have this story:

Venus met a solitary European lady agony. He writes: riding in the opposite direction, a member of the English colony, who was as clever as she was beautiful. Having been long resident in Persia, she was fearlessly riding alone, a long way ahead of her caravan.

"The Germans marveled at such an apparition in such a dreary wastewondered she wasn't afraid-wouldn't she let some of them stand by till her servants and baggage came up? No. she was quite at ease, and usually in her travels was far ahead of her attendants, whose mules, more heavily laden, could not keep her pace. 'And now, gentlemen,' she said, 'who are you, and where are you bound for?'

"They introduced each other; one was the astronomer, another the photographer, another the archaeologist and naturalist, and so on, and they were going to Ispahan to observe the transit of Venus. The lady smiled, started her pony, and waved her adieux, saying: 'To observe the transit of Venus. Ah! well you can go home now, gentlemen, your duty is done. Goodbye.'

Queen Victoria Trying to Servants. Even in the royal household the post of housemaid is apparently no sinecure, and I remember long ago hearing a story of a lady who, while engaging a new servant, naturally made the inquiry as to "why she had left to ships named Wasp, that name has her last place." It came out then that she had been employed at Bucking ham Palace, and that she left because "really Her Majesty (the late Queen) was that particular that after you had done dusting everything, quite as much as necessary, she would pass her name is almost certain to be changed lace handkerchief across a table or a by the authorities in deference to chair and notice even the tiniest speck." Even Buckingham Palace is not good enough for servants nowadays, it seems! It was told of the late Queen that she was so difficile as to the making of her bed that it took the chambermalds two hours daily to make it, as the undersheet had to be most carefully and smoothly stitched to the lower mattress so that there never was the slightest wrinkle, which story recalls the fairy tale of the Princess and the crumpled rose leaf .- The Onlooker.

Caligula's Galleys.

Prostrate With Rheumatic Fever Six

days in December.

"I heartily indorse the testimonials which you publish of St. Jacobs Oil as a pain killer, for I have been a sufferen from rheumatism and kindred complaints at different times during the last twenty years. I have been laid prostrate with rheumatic fever six times during that period, therefore I consider I know something about rheumatism. During all of these twenty years I have tried various advertised , rheumatic remedies, oils, ointments and embrocations. None of them gave me much relief, but when I tried St. Jacobs Oil I found quite different results. It eased the pain almost immediately, and has done for me what all other remedies put together never began to do.

"I could give you several cases that have been cured, which have come under my notice, and through my recommendation; also one of toothache, one of faceache and one of sore throat.

"I have recommended St. Jacobs Oil and shall continue to do so by every means in my power, as I consider you deserving of every support."

The Beet Sugar Industry.

The Scattle Floating Dock.

The Seattle floating dry dock, or the

first section of it, was launched late-

ly. This dock, when finished, will be

200 feet long and eighty feet wide, the

pontoon is twelve feet deep and the

towers thirty feet high; the displace-

ment is 2000 tons and the lifting ca-

pacity 3000 tons. This dock is so con-

structed that it may be used in con-

innetion with another of like dimen-

sions now under construction, and the

two will readily lift the largest ship

in Pacific waters.

A most important article giving Messrs. Oxnard's and Cutting's views on the beet sugar industry in this country appeared on the editorial page of the New York Evening Post of December 12 last, and as every house hold in the land is interested in sugar the article will be of universal interest THE BEET SUGAR INDUSTRY.

The Evening Post bids the heartlest welcome to every American industry that can stand on its own bottom and make its way without leaning on the poor rates. Among these self-support ing industries we are glad to know, is the production of beet sugar. At all events, it was such two years ago. We publish elsewhere a letter written in 1899, and signed by Mr. Oxnard and Mr. Cutting, the chiefs of this industry on the eastern side of the Rocky Mountains, showing that this was the happy condition of the trade at that time. If parties masquerading as beet sugar producers are besieging the President and Congress at this moment, and pretending that they will be ruined if Cuban sugar is admitted for six months at half the present rates of duty their false pretences ought to be exposed.

The letter of Messrs. Oxnard and Cutting was probably written for the purpose of inducing the farmers of the Mississippi Valley to go more largely into the cultivation of beets for the sugar factories. This was a laudable motive for telling the truth and showing the large profits which awaited. both the beet grower and the manufacturer if the industry were perseveringly and intelligently prosecuted. To this end it was pointed out that farmers could clear \$65 per acre by cultivating beets, and might even make \$100. But in order to assure the cultivator that he would not be exposed to reverses by possible changes in the tariff, they proceeded to show that the industry stood in no need of protection.

The beet sugar industry, these gentlemen say, "stands on as firm a basis as any business in the country." They point out the fact-a very important one-that their product comes out as a finished article, refined and granulated. It is not, like cane sugar grown in the West India Islands, a black and offensive paste, which must be carried in wagons to the seaboard and thence by ships to the United States, where, after another handling, it is put through a costly refinery, and then shipped by rail to the consumer, who may possibly be in Nebraska, alongside a beet sugar factory, which turns out the refined and granulated article at one fell swoop. Indeed, the advantages of the producer of beet sugar for supplying the domestic consumption are very great. We have no doubt that Messrs. Oxnard and Cutting are within bounds when they say that "sugar can be produced here cheaper than it can be in Europe." The reasons for this are

that-"The sugar industry is, after all, merely an agricultural one. We can undersell Europe in all other crops, and sugar is no exception."

It follows as naturally as the making of flour from wheat. If we can produce wheat cheaper than Europe, then naturally we can produce flour cheaper, as we do. But the writers of the letter do not

depend upon a-priori reasoning to prove that they can make sugar at a profit without tariff protection. They point to the fact that under the McKinley tariff of 1890, when sugar was free of duty, the price of the article was four cents per pound. Yet a net profit of \$3 per ton was made by the beet sugar factories under those conditions, not counting any bounty on the home production of sugar. They boast that they made this profit while working under absolute free trade, and they have a right to be proud of this result of their skill and industry. Many beet sugar factories had been started in bygone years, back in the sixtles and seventies of the nineteenth century, and had failed, because the projectors did not understand the business. Since then great progress has been made, both here and abroad, in the cultivation and manipulation of the beet. What was impossible thirty years ago is now entirely feasible. The industry is already on a solid and enduring basis. There are factories in the United States, these gentlemen tell us in their letter, capable of using 350,000 tons of beets per annum at a profit of \$3 per ton, and this would make a profit of \$1,050,000 as the income to be earned under absolute free

It must be plain to readers of this letter, signed by the captains of the beet sugar industry, that the people in Washington who are declaiming against the temporary measure which the President of the United States urges for the relief of the Cuban people, are either grossly ignorant of the subject, or are practising gross deception. The tenable ground for them is to say: "Other people are having protection that they do not need, and therefore we ought to have more than we need." This would be consistent with the letter of Messrs. Oxnard and Cutting, but nothing else is so.
